**MMF Chief Executive Officer**

**Dr.eadhah Ali Al-Saadi**

It was a year full of giving, and despite the scarcity of humanitarian funding in Yemen, MMF was able to maintain the continuity of its humanitarian projects, especially those projects related to the field of nutrition for children and pregnant and breastfeeding mothers.

MMF continued the project to treat acute and moderate malnutrition diseases in the governorates of Hodeidah and Sana'a for the seventh year in a row, as part of the nutrition program implemented by MMF, which it attaches great importance to because of its great importance in saving the lives of children and mothers.

MMF is keen to build solid and strong relationships with international and local partners, including local authorities, public health offices, and residents in the targeted governorates and districts, as partnership represents one of the basic principles of work and has a top priority in our interests.

In environmental programs, Medical Mercy implemented a project to protect the community from pollution in Hadramout Governorate, where it carried out several field surveys and workshops through which it sought to protect society from the effects of environmental pollution resulting from oil emissions and environmental pollutants.

MMF seeks to reach a wide range of beneficiaries, as it is expected to expand in the beginning of the year 2023 in the districts of Saafan and Manakhah in the preventive feeding project, in addition to the previous intervention areas.

On behalf of myself and on behalf of all the workers of MMF, I extend my sincere thanks and appreciation to all the partners, local authorities and their various offices who have contributed with us in protecting the community health and saving the lives of children.

## Sincere Thanks and appreciation

*MMF extends its sincere thanks and appreciation to everyone who contributed to the success of its projects during the year. Thanks also extend to all local collaborators, local authorities, public health offices and residents in the targeted districts. Gratitude is also extended to our strategic partner, the World Food Program) WFP ).*

# Vision and mission

## Our message

for a healthy life.

## Our vision

The most available to serve the most  
vulnerable groups

# The Foundation's fields of work

## Health

The Foundation pays great attention to the health sector as it is specialized in the health and medical field and has implemented many projects in the field of health.

## Climate change and the Environment

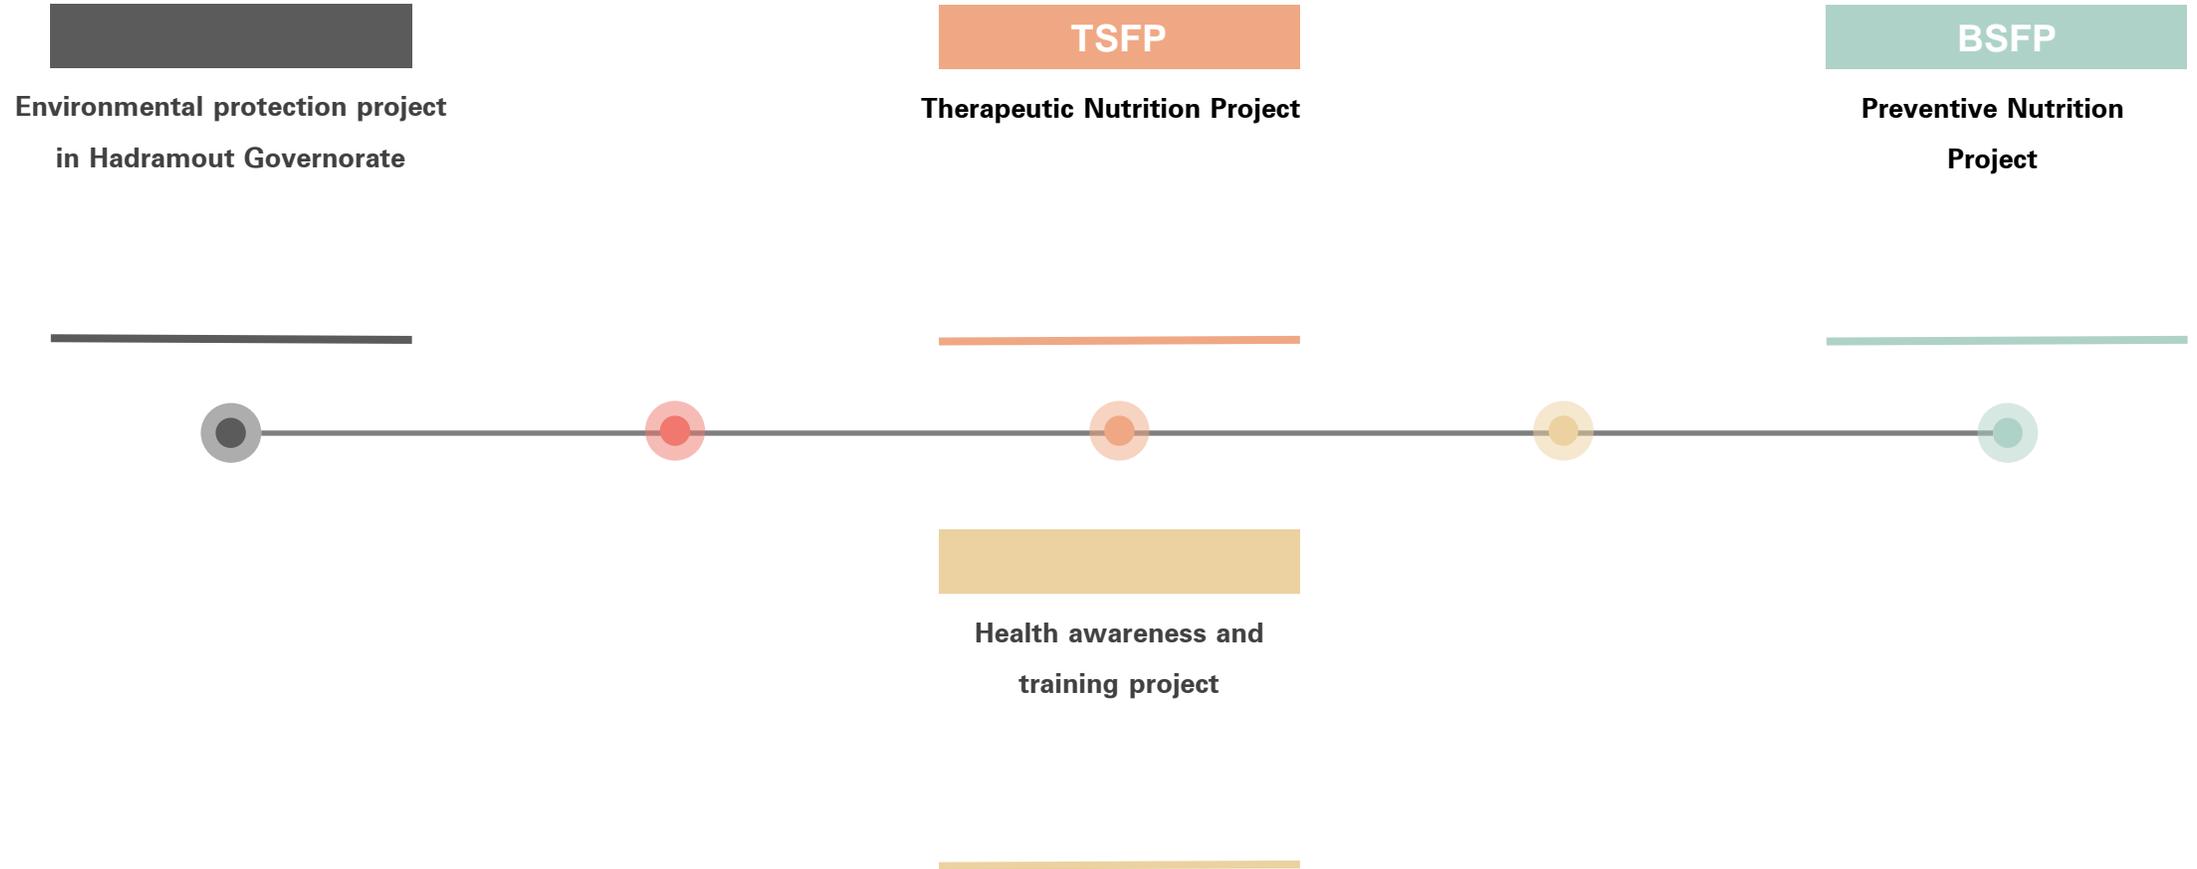

This includes working to protect societies from the danger of environmental pollution and the danger of pollution resulting from human waste

## Nutrition

Medical compassion works to protect children from the danger of acute and moderate malnutrition, as it attaches great importance to the responsibility of saving children from the danger of starvation and malnutrition.

# Programs and projects implemented during the year

# Preventive Nutrition Project

Distribution points for the project in all targeted districts

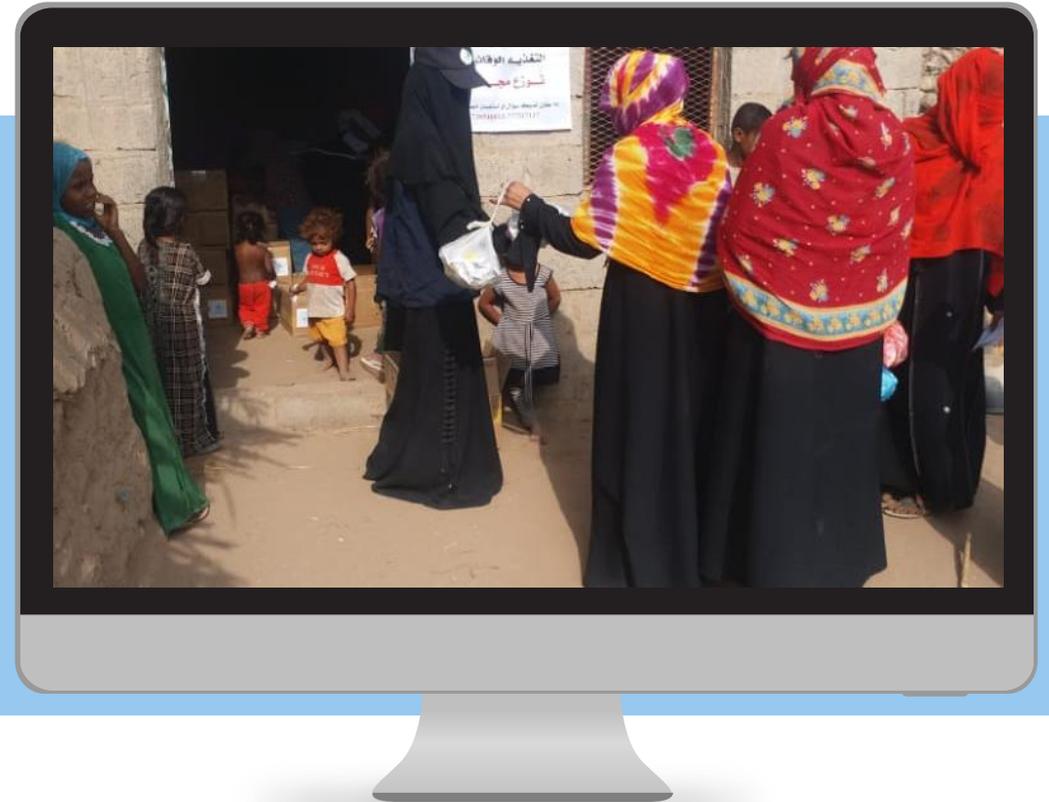

457 community health volunteers in the targeted villages and districts

Survey and sort all children in the targeted villages

Distribution of food packets to children and pregnant and lactating mothers

457

volunteer

745

Tons of protective  
feed

12177

A nursing mother is  
a beneficiary

12.177

beneficiary  
pregnant mother

20,859

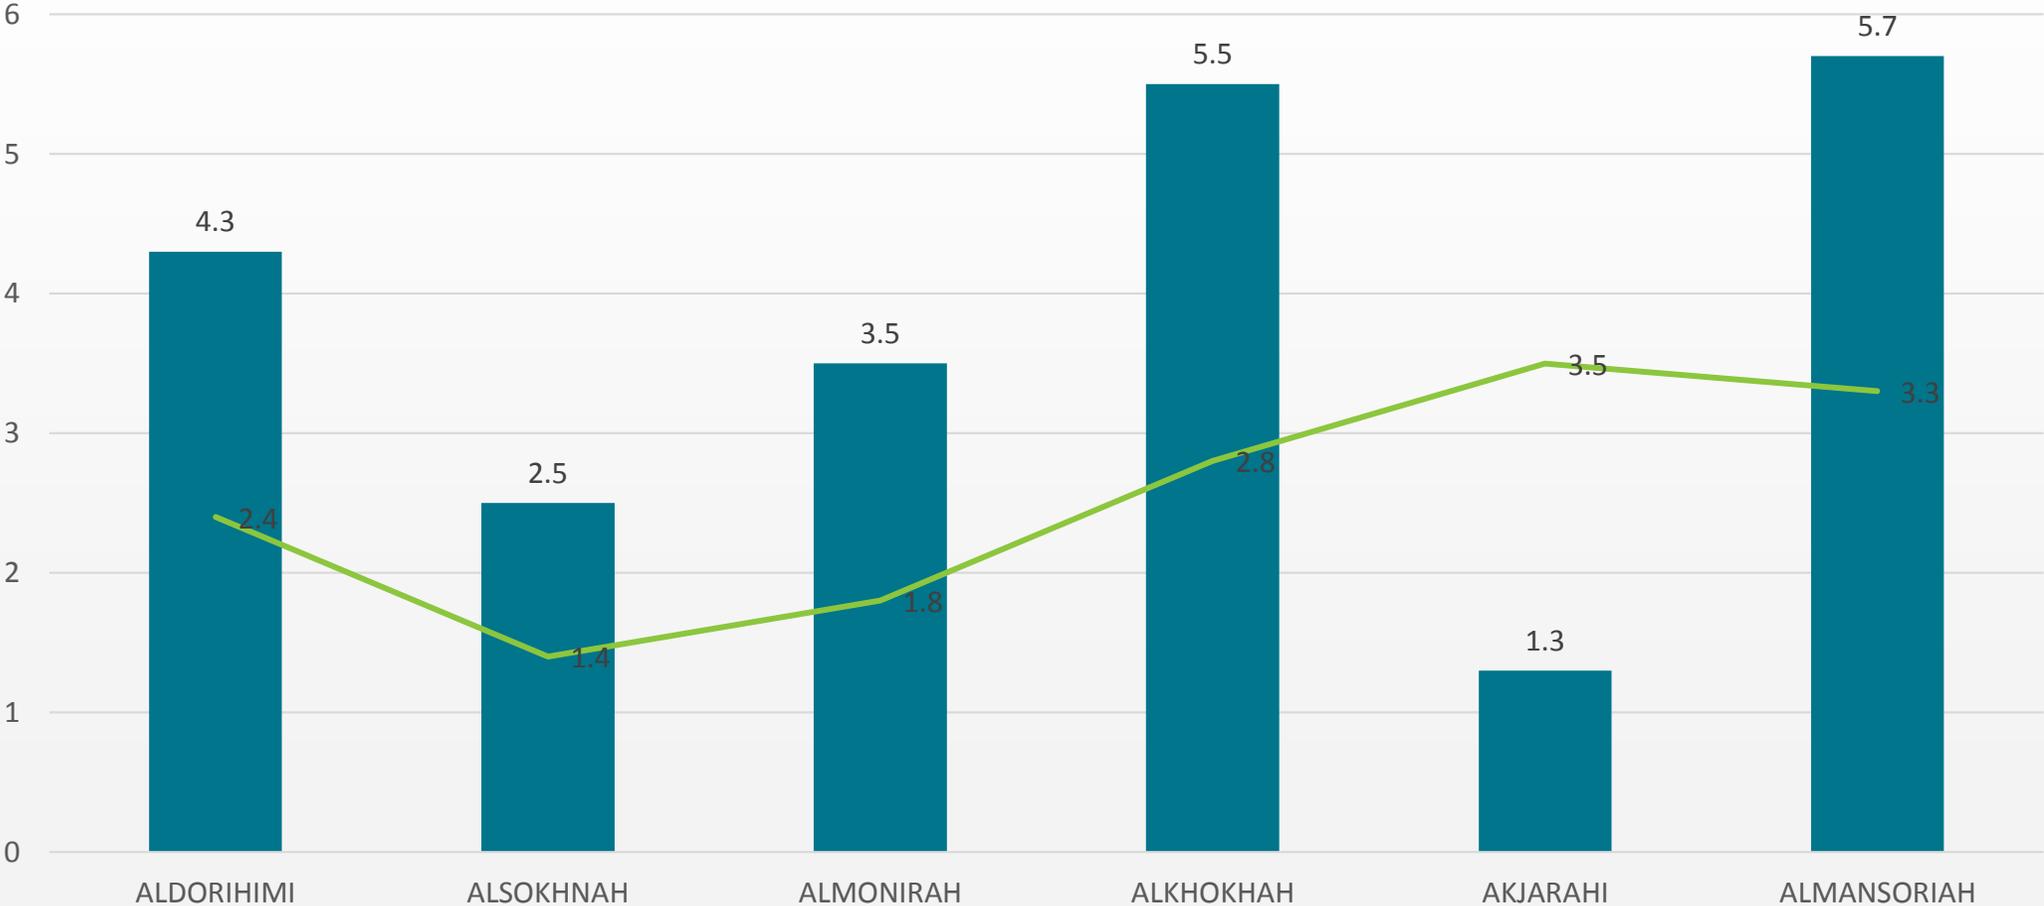

beneficiary child

# Project services

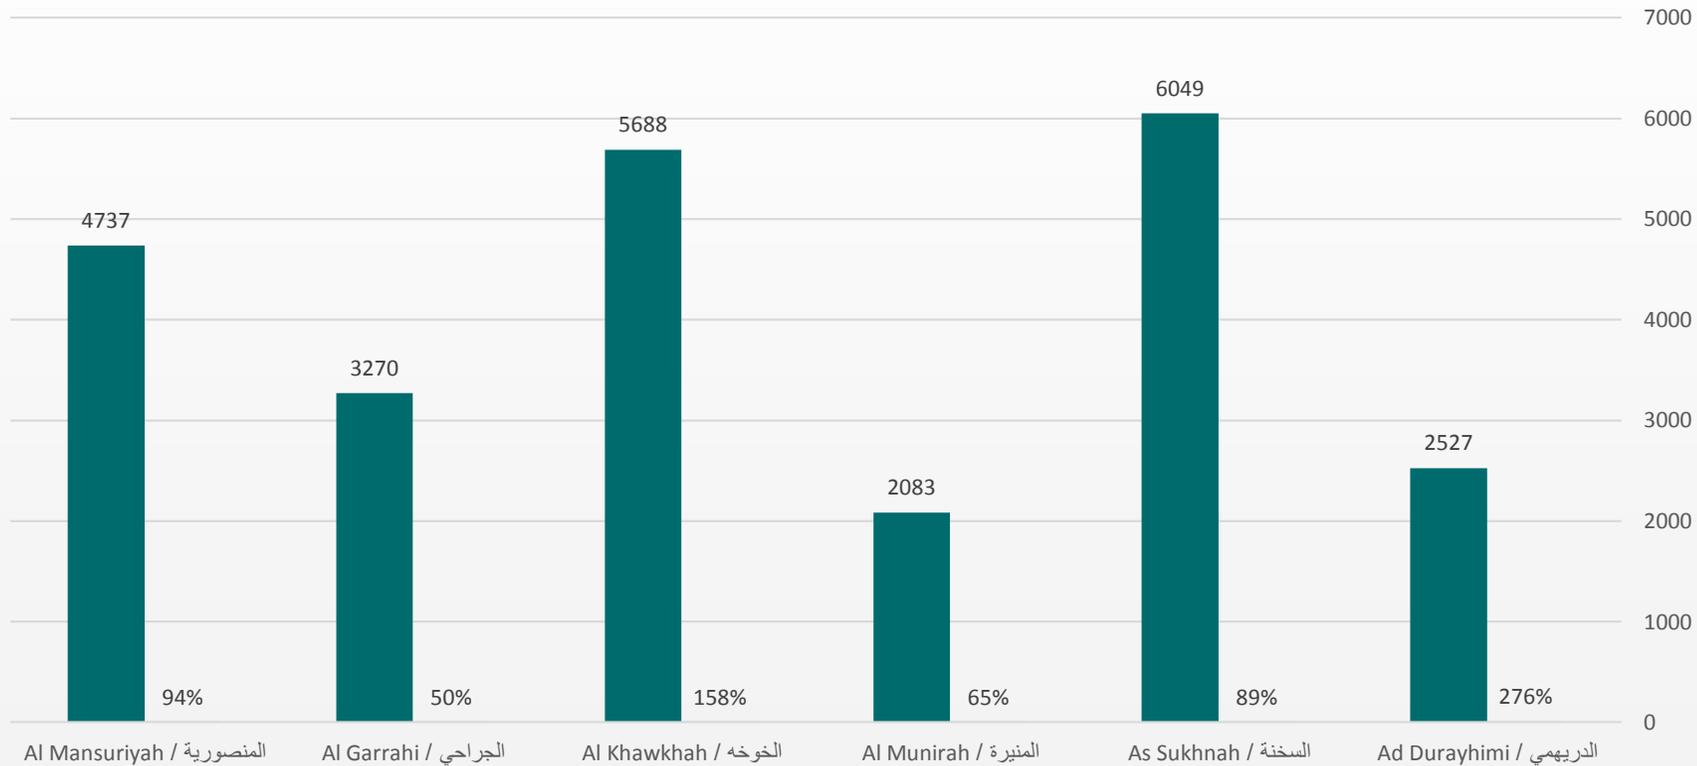

The preventive feeding project provides many nutritional services for children and pregnant and breastfeeding mothers, where medical compassion volunteers sort and wipe all children under the age of two and dispense nutrition envelopes to them, as well as pregnant and breastfeeding mothers

# The number of children benefiting from the project

# The number of beneficiaries of the programme

community health volunteers**

**Pregnant and lactating mothers receiving nutrition  
from community health volunteers**

# Therapeutic Nutrition Project

مؤسسة الترحم الطبية  
MEDICAL MERCY FOUNDATION

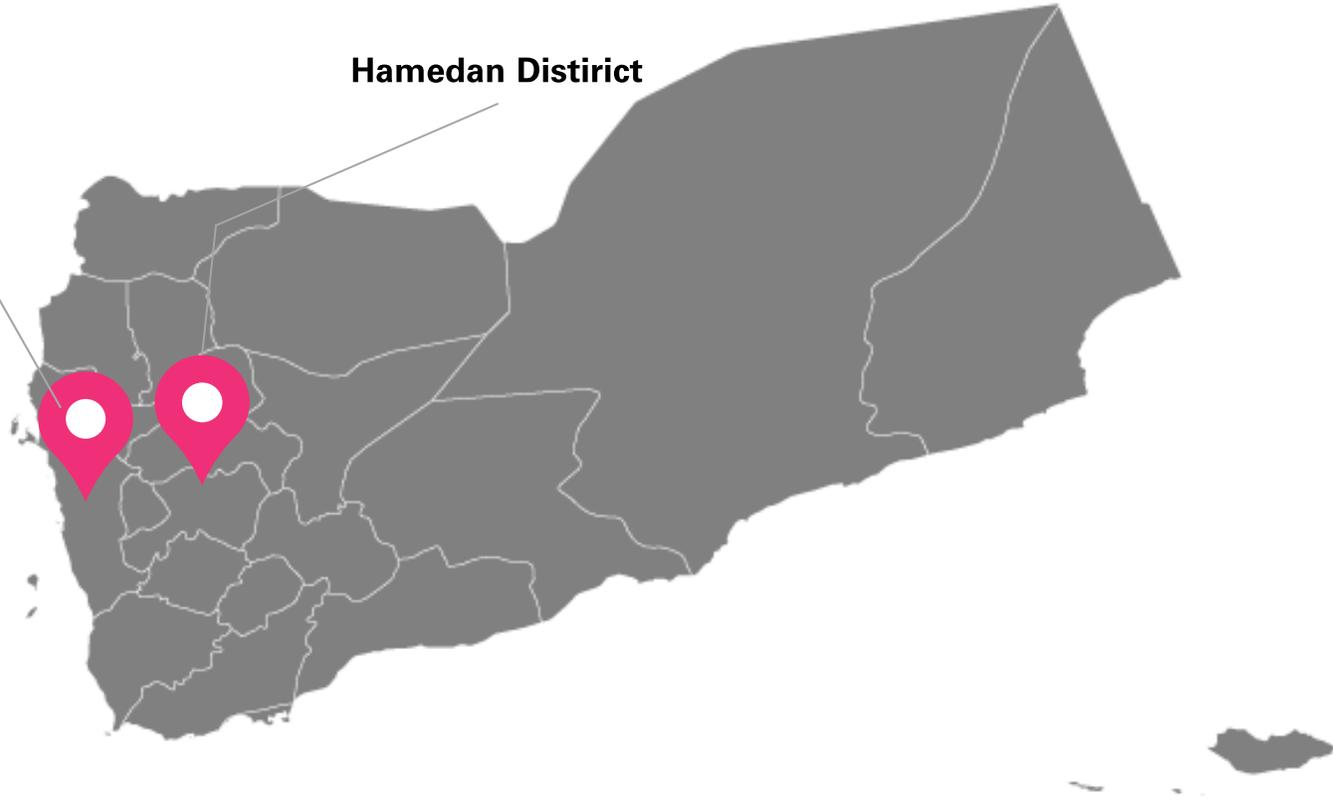

The therapeutic feeding project is being implemented in seven districts in Al Hudaydah Governorate, in addition to Hamedan District, by supporting health units in the targeted districts and providing nutrition services for children and pregnant and lactating mothers who have moderate malnutrition, in addition to mobile teams that serve the community.

## Al Hudaydah Governorate

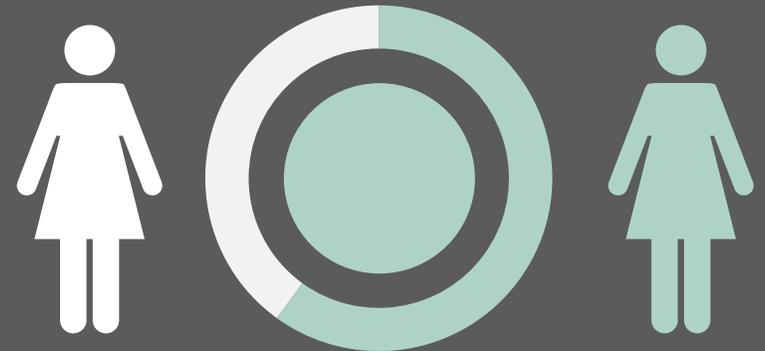

## Hamedan Distirict

**Directorates:**  
Al–Durayhimi District,  
Al–Sukhna District, Al–  
Khawkhah District, Al–  
Mansoori District, Al–  
Munira District, Al–  
Mansouriya District

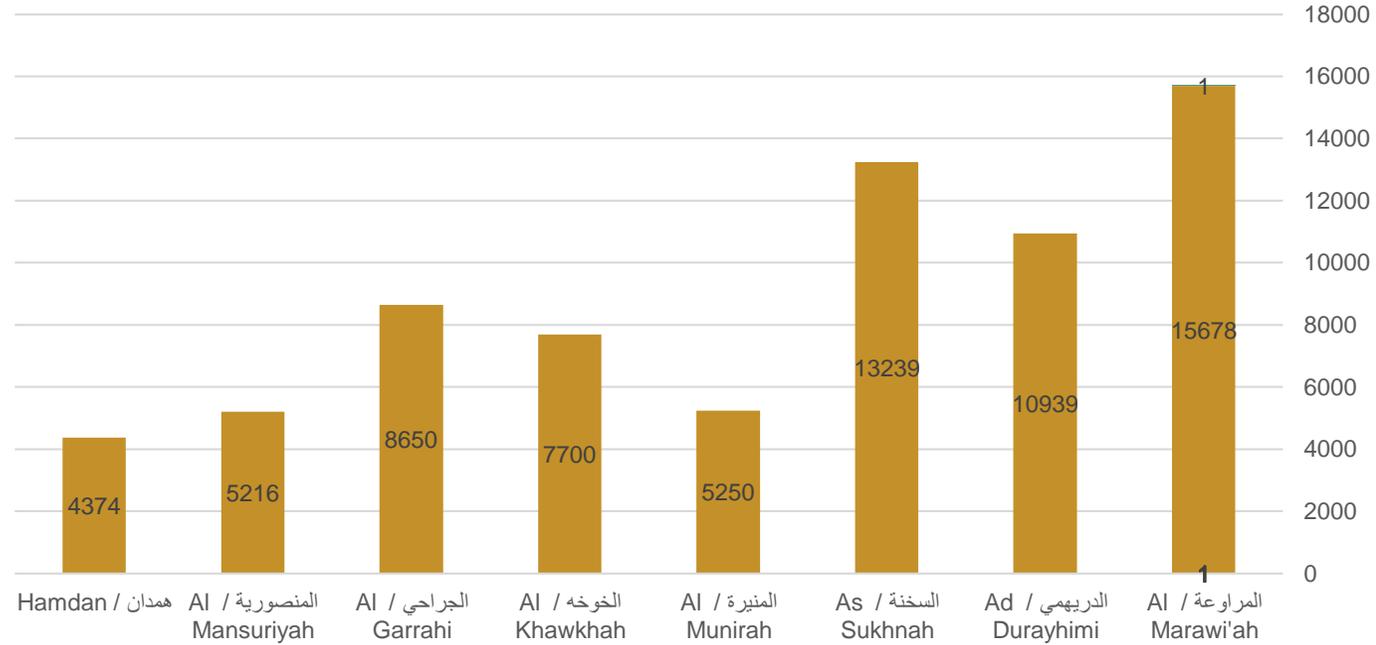

## The beneficiary and n of the legislator

Pregnant mothers were reached by 60%, while breastfeeding mothers were reached by 40%.

## The number of children benefiting from the therapeutic feeding programme

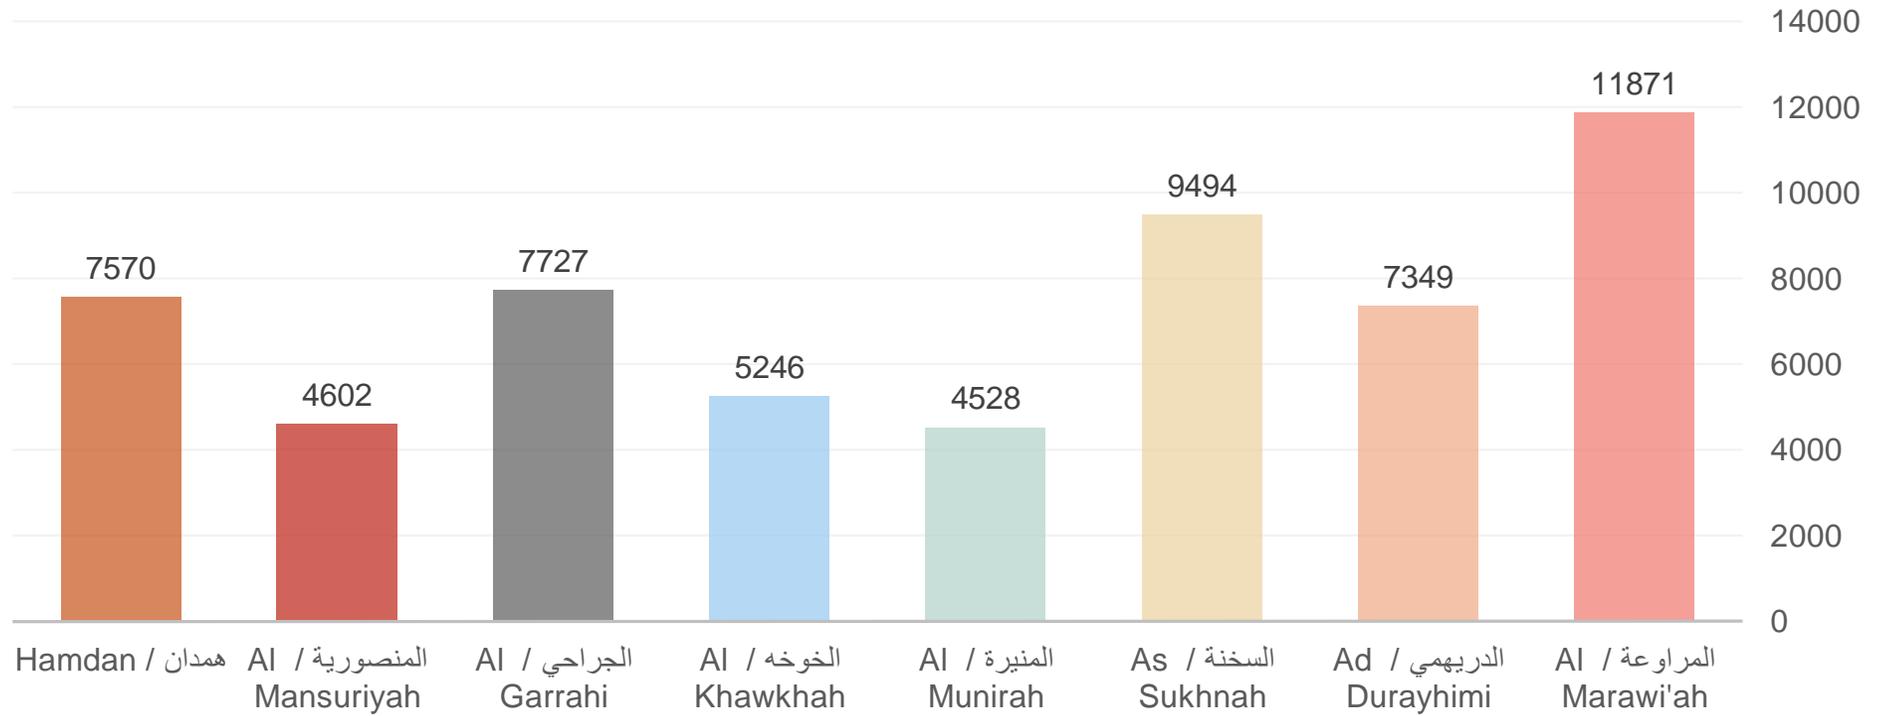

## Project beneficiaries

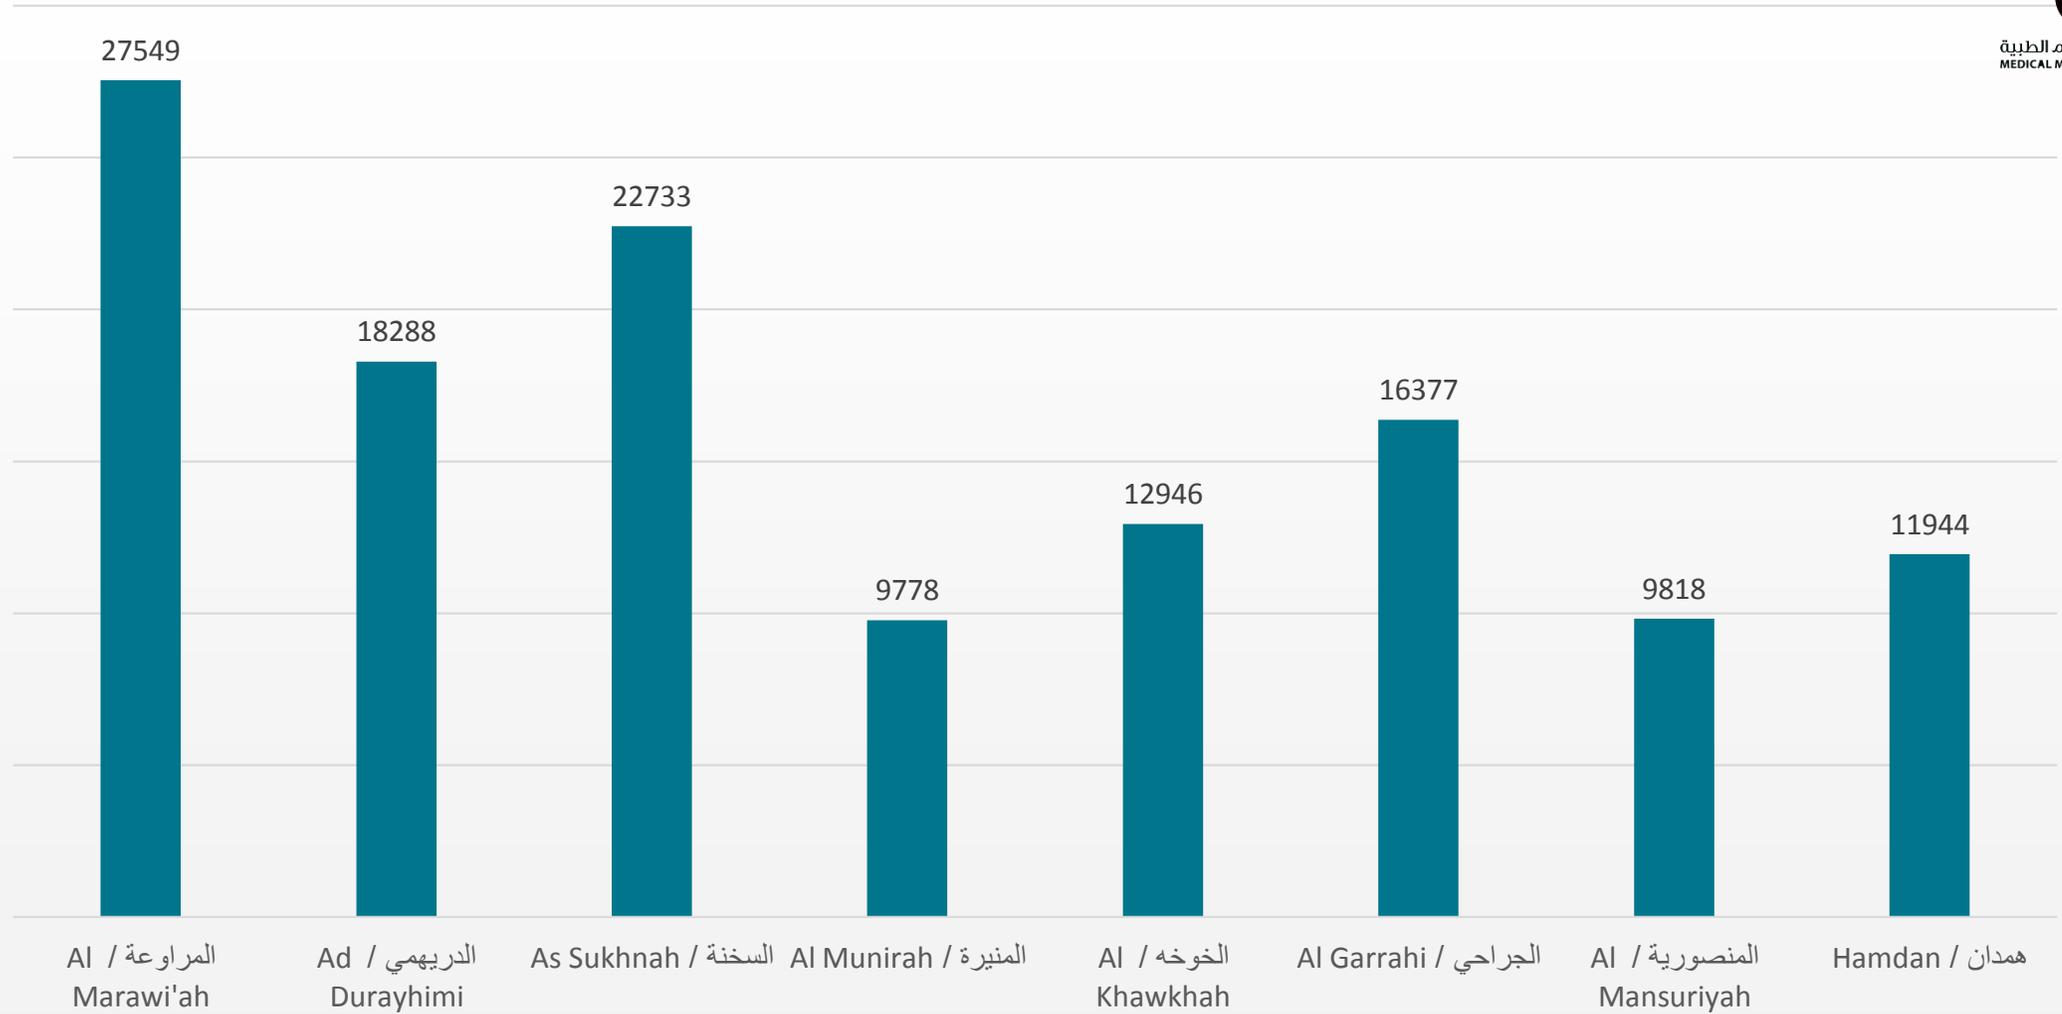

43% of males benefited from the project,  
while 57% of females benefited from the project.

## Pregnant and lactating mothers receive nutrition from the Compassion Field Teams

## Children receiving nutrition from the medical teams of Mercy

# Pictures from the project

Children receiving nutrition from MMF medical teams

Pregnant and lactating mothers receive nutrition from the Compassion Field Teams

## Environmental protection project in Hadramout Governorate

The project aims to identify the effects of pollutants on local communities and the environment in Hadramout, and to contribute to providing some treatments for them to achieve societal peace .

The main activities of the project:

- Field study
- Training courses for specialized cadres
- Awareness campaign – Conciliatory workshops
